Yogesh Avdhut

MERN Stack Developer

+91-8421313738 dev.yogeshavadhut@gmail.com LinkedIn Github Portfolio

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3
Frameworks/Libraries: React.js, PrimeReact, Bootstrap
Backend Technologies: NodeJs, ExpressJs
Databases: MongoDB (NoSQL), MySQL (basic)
Developer Tools: VS Code, Git GitHub, Postman, npm, Docker
Additional Skill: REST APIs, Authentication (JWT), OOPs, DBMS, Debugging

Experience

Skramby Technology Solutions **July 2024 – Oct 2025**
MERN Stack developer *Pune*

1.Cabeefly | *Online Cab Booking Platform*

* Cab booking platform where I worked on Admin Panel, Website, and Backend, contributing to end-to-end application development.
* Backend: Designed and implemented APIs using Node.js and Express for handling driver and cab modules.
* Payment: Supported integration of Razorpay for handling online transactions.
* Docker Integration: Containerized the backend, database in a single folder to simplify setup and ensure the platform runs seamlessly with one command.
* AWS: Familiar with core concepts like EC2, VPC, Internet Gateway, and NAT Gateway.

2. changexpert | *Online Educational Training and Placement Platform*

* online e-learning, training, and placement platform. I got the opportunity to contribute: Website and Backend.
* Main Website: Built responsive and user-friendly UI components using React.js, JavaScript, HTML, CSS, and PrimeReact for student-facing features.
* Developed RESTful APIs using Node.js and Express.js, and managed MongoDB Atlas for handling users, courses, placements, and student data.
* File Upload and Docker Integration: Implemented student profile photo upload functionality using backend services (Multer/Cloud storage) and containerized the application using Docker to ensure consistent deployment and scalable file handling.

Zoom Computers – Deputed at PCMC Corporation, Pune **July 2023 - June 2024**
Computer Engineer (IT Support) *Pune*

- Handled IT support and maintenance for computer systems at PCMC Corporation.
- Installed, configured, and updated hardware, software, and networking devices.
- Provided technical assistance to staff and resolved daily IT issues.
- Maintained system security, backups, and troubleshooting logs.

Education

Dr. Babasaheb Ambedkar Marathwada University Sub-campus, Dharashiv **July 2021 – may 2023**
Master of Computer Applications *Grade: 70%*

Shriman Bhahusaheb Zadbuke Mahavidyalaya,Barshi **Jun 2018– May 2021**
Bachelor of Computer Applications *Grade: 70%*

kalegaon Jr.College, Kalegaon **Jun 2017– Mar 2018**
Higher Secondary Certificate in Arts *Grade: 78%*

Projects

Kirana Store E-Commerce Platform | *Full Stack Project*

- Designed and developed a smart web application for managing kirana shop operations.
- AI Integration: Used Claude AI for fraud bill detection, shop data analysis, and stock recommendation (increase/decrease).
- Price Insights: Displayed daily price analysis for local markets (Barshi, Solapur, Maharashtra) with multiple comparison columns.
- AI Assistant: Integrated AI-based help/search feature for quick queries and decision support.
- Frontend: Built responsive UI using React.js, JavaScript, HTML, CSS, PrimeReact.
- Backend: Developed REST APIs using Node.js and Express.js for handling products, billing, and analytics.
- Database: Used MongoDB Atlas for storing products, transactions, and shop data.

Expense Tracker App | *Full Stack Project*

- Built a web app to manage daily expenses with add, edit, and delete functionality.
- Frontend: Developed using React.js, JavaScript, HTML, CSS, PrimeReact.
- Backend: Implemented with Node.js and Express.js for expense CRUD operations.
- Database: Used MongoDB Atlas to store expense records.

Cab Booking Clone - savaari | *Frontend Project*

- Developed a cab booking frontend application inspired by Ola/Uber.
- Features: Cab category selection, pickup and drop input forms, and booking confirmation page.
- Frontend: Responsive UI built with React.js, JavaScript, HTML, CSS, PrimeReact.

Languages Known

- English, Hindi, Marathi
